SUMMARY

Product Manager with 5+ years building B2B SaaS and marketplace products end to end, from discovery and prioritization to delivery, launch and measurement. Hands-on and technical: comfortable with SQL, analytics instrumentation and building working prototypes in React/TypeScript with Claude Code. Currently focused on data and AI products.

EXPERIENCE

Mercado Libre · Product Specialist, Data & AI

Oct 2026 to present

Fintech platforms · Buenos Aires

- Product role in the Data & AI team inside Mercado Libre's fintech platforms.
- Internal data products: data warehouse, semantic layer, metrics governance and GenAI capabilities.

Desky · Product Manager

Nov 2024 to Aug 2026

B2B coworking marketplace · LATAM and Spain

- Owned the end-to-end roadmap of a marketplace with 20+ client companies and 750+ spaces across LATAM and Europe, reporting directly to the CEO.
- Led a squad of 2 engineers and a designer through discovery, prioritization, delivery and launch.
- Rebuilt analytics instrumentation in PostHog (event schemas in HogQL), fixed cohort contamination in conversion data and ran the funnel analysis that drove a checkout redesign.
- Redesigned onboarding and authentication (SSO, duplicate-user detection), reducing friction and improving activation.
- Launched Office Manager features (booking approver, team lead roles, reporting dashboard) and automated booking validations, cutting manual interventions.
- Improved lifecycle communications and reactivation flows based on user behavior, lifting retention and repeat usage.

Takeoff Media · Product Manager

2023 to 2024

SaaS and digital products · Uruguay

- Managed 3 products in parallel, including the company's largest project (a 20-person team).
- Set up product processes from scratch: user flows, documentation standards and prioritization frameworks.
- Coordinated engineering, design and stakeholders to deliver with clear scope and timelines, reducing rework.

LFI · Project Manager

2021 to 2023

EdTech SaaS · Chile

- Took an EdTech product from MVP to a commercial product used by 50+ companies, leading a team of about 10.
- Defined requirements, user stories and acceptance criteria; improved predictability and reduced post-release issues through clearer validation and QA.

PROJECTS

- **Roadmap Studio** (roadmap-studio-beta.vercel.app): Roadmapping app with multiple roadmaps, RICE prioritization and CSV import, instrumented with PostHog to validate usage.
- **Morlaco** (morlaco-nu.vercel.app): Personal expense tracker (PWA) exploring AI-native input by voice and screenshot, plus data export for analysis with agents.

SKILLS

Product	Discovery, roadmapping, prioritization (RICE), activation and onboarding, checkout and conversion, lifecycle, stakeholder management
Data and tech	SQL, PostHog / HogQL, analytics instrumentation, React / TypeScript prototyping, Claude Code, Vercel
Tools	Jira, Confluence, Notion, Figma, Miro, Intercom, HubSpot
Languages	Spanish (native), English (B2)

EDUCATION

Universidad del Museo Social Argentino · Bachelor's in Journalism — 2015 to 2018
ORT Argentina · Systems Analysis — 2019 to 2021
